

Food Summit 2019 Joint Statement

July 13, 2019

Nakamura Gakuen Girls' High School

1. Introduction

Some of our human kind is experiencing harsh conditions such as famine. But while some of us are wealthy enough whereas the huge number of people are under severe conditions. One in nine people are going hungry. We found a comprehensive solution to solve these issues.

2. Our Proposal

(1) Current Issues

1. Food wastage, leftover
2. Poverty
3. Lack of investment
4. Lack of knowledge and awareness

(2) Proposal of Solutions

1. Collect wasted food, sort and distribute with volunteers, NGOs, governmental efforts
2. Donation and charity
3. We will get a favor from the people by using social media, such as facebook, Instagram, and twitter.
4. Teach underprivileged people to avoid dependence upon donation, which means to teach them how to make things by anything that they have.

(3) Action Plan

1. Use volunteers to help reuse and recycle wasted food. Sort, separate, and distribute among those in need.
2. Spread #startsmallgobig to raise awareness, donation plan, create websites like gofundme.com to raise awareness because a huge number of people do not know where to donate the money.
3. We will start it by using celebrities to begin in a whopping scale, then it will spread in any area by assembling people for one purpose. As we said in the second solution, we will establish a site to let them allow to donate for underprivileged people and agricultural purpose. We believe which will be applied a wide range by virtue of some prime examples.
4. Students or anyone can go to the underprivileged people how to make things by anything like origami, or stuffs like that, which will help them how to live by themselves without waiting others to do things for them.

3. Conclusion

We believe that our solution will be comprehensive. At first, we will encourage volunteers, families, and others to help the underprivileged people to live equally by doing these things gradually. The first solution can provide them with food, and the second solution will spread our donating website throughout the world, and the third solution will allow a large volume of people to attend in the movement, then the last solution will teach underprivileged people how to live well by doing things by themselves. Hence, our solution can be conducted with one another to increase the equality, and the volunteers, or anyone choose which one they want to do. As a result, global issues will be diminished dramatically, if we can apply these solutions.
