**Topic** World is in hunger by a human nature / 人間の本性が世界に飢えをもたらしている

### Current Issue of Topic / テーマが抱える課題

What is the biggest fear of humans? Of darkness? Or of insects? It is time for human beings to fright from one another. Our mother nature is sacrificed for the purpose of a few peoples luxurious living. While some people are enduring poverty, others are drifting on wealth and feeding off of them. However parents' responsibility is to lead their children to a satisfactory life. But some do not realize how their intent brings harm to others' children. A prime example is for a parent to bring devastation to another child's birthplace in order to provide a wealthy life for their own offspring. What happens then? The thousands of children who are bred in that devastating situation will have suffered the outcome of barren soil. Some will have died from malnutrition. There is a saying that goes "the suffering of many pays for the luxury of few". Furthermore, there are some reasons why famine is increasing. Famine is caused by several factors; including war, inflation, crop failure, population imbalance, and government policies. For instance, in Yemen, over 850,000 children have passed away so far due to these causes. In 2015, a civil war started for government authority in Yemen. Then, the following year, massive famine started due to the war. There are some examples of what happened to children. Amal Hussain, a seven year old girl who turned the world's eyes to Yemen's devastating war, has died. The child died because of malnutrition, in a refugee camp in Yemen. Her mother stated "My heart is broken. Amal was always smiling, but now, it is dead. And now, I am worried about other starving children. As you can see, people are dwelling without looking at Mother Nature and other human beings. They are dwelling only for their own benefits. Maybe, the blind are better than they are." Natural resources such as soil fertilization, gold, and cobalt are connected to the earth's veins, similar to veins of flesh. If we cut our veins, it's reason enough for death. Just like this, every natural resource is connected to each other. If we dig for gold too much, the earth's surface will be prey to drought. As a result, Mother Nature will be annihilated.

Ever issue depends on humans, it all starts from people. Humans started everything, but we can also end that which we started.

人間を最も脅かすものは何か。それは他でもない人間である。たとえば、世界の裕福な人たちの贅沢な生活は、大多数の貧しい人たちの犠牲の上で成り立っているのである。そのような貧しい国の人々は飢餓に苦しんでいる。また、戦争・インフレーション・作物の不作・人口の不均衡や政府の政策も飢餓の要因になっている。このように、飢餓を引き起こしているのが人間ならば、それを解決に導くのも人間であるべきだ。

### Solution of Issue / 解決策

What is the solution for this problems? There are several issues making world hunger; involving egoism, a real human being and natural resources. In order to fight against these problems, we need to give a hand to one another.

World is in hunger by a human nature. Why the earth is lacked by real humans while there are seven billion people? and who is a real one? A real human is someone who can put themselves instead of others who are in a severe situation. For example: J.K.Rowling who is the world's famous author has persevered through lot of difficulties. Her suffering life started when she was dropped out of college at 17. After that, her mother passed away because of disease when she was 25. Then, she endured a miscarriage at 26. Her husband used to abuse her after the marriage and her husband left her with her baby at 27. And they have divorced after the year. At age 29 she was a single mother living on a welfare. And she tried to commit a suicide at 30. After all of this severe situations, she followed her desire that she can do better than anyone else. Then she published her first book. As u can see, she finally overcame these situations and released the Harry Potter. After she become rich, she started giving funds to underprivileged people and single mothers. This is the prime example of the real human who can worry others behalf of them.

Human is a real enemy for themselves. War is just for the authority of government, or territory. No matter this is for authority, it sacrifices dozens of things; including famine, loss of economic condition, and harmfulness for mother nature. For instance: During the World War II, humans utilized a massive amount of harmful substances. Because of those, ozone layer has damaged a lot. Hiroshima was bombed by Americans in 1945. Consequently, 129000-226000 fatalities were identified. Furthermore, a river is still poisonous due to the bomb.

As we look back, what was the benefit? therefore, no one has benefited with each other. So, we need to be friendly, and equity. As we can see them, human is same as predators. Maybe we have regarded us as a best good of the nature too early. We need to learn how to love each other and respect one another.

世界に飢餓をもたらすのが人間であるならば、その問題を解決するには、人々が手を取り合って協力し合う必要がある。人間の本来あるべき姿は、他者を優先させることである。今や、世界で有名なJ.K.Rowling氏は、若いときにさまざまな困難を経験したが、いつも情熱を持ち続けていた。その甲斐あって、処女作を出版後、雷を築いていった。そのお金を以前の自分と同じ境遇にあり、苦しんでいる人に寄付したのである。このように、人間は互いをいかに愛し合い、尊重し合うかを学ぶ必要がある。

### Message to Audience / メッセージ

Maybe some of us have never experienced the famine. We have never thought about hunger until we research. After that, things that we understood were hunger and malnutrition are a part of an ongoing cycle as both a cause poverty and inequality. Ending the famine is one of the greatest challenges in the world. So why should we care? We are all humans, we are all living on one planet. We do not need to look back to our grandparents' life because it can be happened tomorrow. That is one of fundamental act of humanity. This is not a negotiable thing, famine. The most difficult thing to fix this problem is human nature. We are sacrificing other people to fulfill our desire. Even if we are living in a peaceful life here, people are died in the other side of the world. We know that people are died but not helping the creepy incidents.

私たちは飢餓を経験したことがないので、研究して初めて飢餓について考えた。また、貧困と不平等が飢餓と栄養失調を引き起こし、永遠と続いていくことがわかった。だからこそ、この飢餓の問題は、世界で最も難しい問題の一つであり、私たちは手を携えて取り組むべきだと考えた。
